

NJ CSO Status:

30 municipalities with combined sewer systems, and over 200 CSO points statewide

- 5 municipalities have completed Long Term Control Plan requirements
- 21 of the remaining 25 municipalities discharge to the New York / New Jersey Harbor Estuary
- 23 billion gallons per year from approx. 140 CSO points

Status of the CSO Permits:

1995 General Permit for CSOs:

- Required implementation of some of the NMCs, including solids and floatables controls.

2000 Reissued General Permit:

- Required rainfall analysis and system characterization that would feed into the LTCP.

2004 Reissued General Permit:

- Required LTCP cost-performance analysis of CSO control measures.

2013 and 2014:

- NJ issued the draft individual CSO permits for public comments
- US EPA reviewed most of the permits and provided comments to NJDEP

2015 January/February

- NJ expecting to issue the final permits for 25 CSO communities
